This game is beautiful, though it may be quick, it's challenging and one wrong move might make you restart the level, It has adventure and puzzle, The story is not much but there is one and it's kinda cool. The game is also very cheap, and trust me you get a lot for that 99 cents. Also the art style in this game is awesome. The gameplay is fun too, it feels really satisfying to trap the monsters behind boxes, This game is easy to run, cheap, beautiful and most of all fun.. I really enjoyed this. Any of my friends/family that are too cheap to buy it should phone me and come see it at my place. It does much to reveal indie games as an emerging art form. I feel inspired to take my own minor role in society more seriously because of it.. Beautiful art. Beautiful sound. Beautiful Final Ending..

1. Beautiful art. Beautiful sound. Beautiful Final Ending..

6. OCULUS

1. It's a pretty good experience. When the sexy beauty stands face-to-face and dances in front of you, I don't care about the gameplay. Just enjoy it.
2. The game is a bit difficult to use. You need to position the hand in the correct virtual position, and then click or pull the contact as prompted (when the loop is minimized). At first, I always mastered the right timing and position. After playing a few more games, I gradually found a feeling that I could enjoy watching beautiful music and playing games while listening to music.
3. The picture is a little whitish and it feels like a smoke effect. This looks like a clue to make CLUB feel more authentic. After all, most of the night scenes are so "smooth".
4. I hope that the addition of beautiful women's clothing later can be more sexy, after all, most of this game should be a male player
5. Currently is a trial version, I hope the game can improve better
6. OCULUS experience is better than HTC vive, clearer, more convenient handle. I've to admit that wasn't easy to find the words to describe this game, because it is so peculiar and unique that is really difficult to define it. Starting from the plot, this game tells us the story of a man who has found a very particular book, which seems to know us; following an unknown voice we will be driven into different worlds, where we have to solve some unusual and stimulating riddles. The game is not that long, but, I mean, there are game that last 8 hours but that are really boring, while this game has a specific soul and it is captivating. It's really difficult to explain the care and the attention that the developers have used to recreate each levels and you'll understand that everything in the game has a specific meaning. Moreover, buying the game you'll also receive the ebook, upon which the game is built and that contains the "lore" of the game.

I've really enjoyed playing the game and I would like to congratulate the developers for the game they have created, because it has a specific soul and it is a really brave game and it's only thanks to this kind of game that the industry may grow.. Very nice to have some fun in a fighting/co-op couch game!. Dude, like, i got this game because of this song WORTH IT. Arkanoid to the next level, funny, enjoyable, and unique.. I didn't want to pay the price for the game considering there are a few free to play pixel coloring games on Steam for free but....I am not regretting my decision now. LOTS to do and hopefully more to follow in future updates. Good job Online OciGroup SL!

It's more than good enough for me. It's very short, but the replay value makes it worth it. Most of the plot stays the same, of course, but there are a lot of different ways for the endings to play out. Given the price, it's quite worth a shot if you enjoy the demo.. Escape the goddamn machines already man, wtf. The screenshots and trailers made this game look pretty cool, like something similar to Amnesia The Dark Descent. When I saw the price, I had my doubts on its quality, and those doubts ended up being correct.

First of all, the opening screen (eg when you press "New Game") is bugged if you have a higher resolution than 1024x768. Text disappears off the side into two black boxes. Then when the game finally started I couldn't do anything; I had to alt-tab out of the window and click back into the game for it to work properly. There are no transitions from the title menu to the game, nor from one level to another; so when the game swapped levels I thought for a minute the game had crashed. Transitions are so so important.

The controls are not clearly explained; it took me a minute or two to realize that I had to equip my lighter before I could start using it, since I was under the assumption it would be assigned a key like "F". Even when you pull the lighter out from your inventory you still have to click a few times for it to "light". I found that to be particularly annoying. It also looks like you should be able to light up things like the lamps on the walls and the fireplace, but I've tried pressing all the controls while my lighter was out and nothing seems to work. If I'm not supposed to use my lighter on them, why does text pop up in front of them?

The game is also nonprogressible after your lighter runs out of oil if you can't find more of it. I don't know if you're supposed to find oil, but I couldn't find any from the start of the game and within five minutes I was unable to see anything. In real life, even when the lights are out in a house, your eyes will adjust to the darkness at least a little bit, so that you can make out shapes. It shouldn't be pitch black.

As for the scare factor, it definitely has an atmosphere, I'll give it that. The three jumpscars I ran into were kind of cheesy but they did startle me a little bit. But it was ruined by my frustration with the game mechanics and inability to see anything after my lighter ran out.

If you are looking for a good, short, horror game, this is not it. I would not recommend this game to anyone unless the developers address some of these issues first. It seems to me that it was really rushed and could've used a month's more worth of tuning up.. Absolute crap and so unoriginal. Keep your money kiddies.. I have money to spare, I don't care about price tags, I just like to support games I love.

I sure do love the Tales franchise.

Loving the Alice cosplay, kinda gives me an eyesore to see the same outfits for most of the early game until you unlock new ones through events and such, makes and breaks the game especially when you wear ANGRY SUNGLASSES.

Overall it's an okay DLC it's nothing but cosmetics, so don't bother if you don't care.. Performance is so poor, always lagging  
And the traffic in highway is awful

I love Gladbeck but this is really not recommend, so regret I pay for this. this was a great game ive played it over and over again and im still hooked on it is there going to be a second game ? i really pray there is. think this game is Amazing!

Although the game is still in Beta.

I think that a lot of things just look strange.

I'm still excited for New dinosaurs like Baryonyx and Saurophaganax.

Either way hopefully this game gets better!

(Also I'm not a fond of the whole droid idea. just sounds chessy?). Great game that accurately embodies the board game of the same name. The AI needs improvement so I am looking forward to the upgrade, but otherwise very enjoyable. Hope to see the other games in the series on Steam soon!. Its literally impossible to get a 200 combo or a score high enough to get a rank higher than F- so you cant even get the achievements without hacking them. That was like the only reason to buy the game was the achievements.
